Mission Communications, LLC

Statement of CPNI Procedures and Compliance

Mission Communications, LLC ("Company" or "Mission") operates as an international reseller of operator assisted services, and as such, provides operator assisted call completion services to transient users of hospitality telephones for calls originating in foreign locations and terminating to the United States.

Mission does not have any CPNI and therefore cannot use or permit access to CPNI. Neither can the Company disclose CPNI to customers over the telephone, on-line or in-store. Moreover, Mission does not market its operator services to end users in any fashion. Its marketing efforts are directed towards aggregators and such efforts do not include the use of CPNI.

The Company does retain billed call detail. This information resides in the Company's computers, accessible only to the Company President. Customers do not contact the company directly. The Company does not disclose CPNI over the telephone or via an on-line system. The Company does not have any retail locations and therefore does not disclose CPNI in-store. If it elects to do any of the above, in the future, it will follow all the applicable rules set forth in 47 CFR Subpart U.

Company services are billed by the local exchange carrier or via credit card. All customer service inquiries are handled by the Company's billing company. To the extent the billing company is acting as an agent for the Company, disclosure of call detail information to customers over the telephone would most likely fall within the exemption for customer service/billing disputes since the customer would be able to provide all of the call detail information necessary to address the customer issue. To the extent the customer could not provide the call detail information to qualify for the exception, the Company has verified with its billing company that it understands and complies with the CPNI requirements on behalf of Mission.

Statement of CPNI Procedures and Compliance
(Page 2)

Should Mission expand its business in the future to include the provision or marketing of services that involve CPNI, it will follow the applicable rules set forth in 47 CFR Subpart U, including, if necessary, the institution of operational procedures to ensure that notification is provided and customer approval is obtained before CPNI is used or disclosed, that it implements authentication procedures that do not require the use of readily available biographical or account information, that it notifies customers of account changes, informs law enforcement in the event of a breach of customer CPNI and otherwise complies with all CPNI protection requirements.

Requests for raw call records by law enforcement agencies are only granted if a subpoena is provided.

The Company has not developed any information with respect to the processes pretexters are using to attempt to access CPNI.

Because Mission has no CPNI, it has not taken any actions against data brokers in the last year.

Because Mission has no CPNI, it did not receive any customer complaints about the unauthorized release of CPNI in the calendar year 2009.
